

Interdisciplinary workshops

The purpose of these workshops is that the participants get acquainted with each other, get to know what people are interested in, and discuss possibilities for collaboration across workstreams.

One of the goals of DIREC is to facilitate interdisciplinary work to create new ideas, new knowledge, and/or new technologies.

The format is as follows:

- People are divided into groups of 12-14
- A chair is nominated for each workshop – the job of the chair is to facilitate the workshop (The person with the star before their name).
- The chair has free hands to decide on the format, but we recommend the following:

Workshop flow

- Each group elects a secretary that takes notes in the form of PowerPoint slides summarizing ideas for collaboration.
- The chair starts by welcoming people and shortly presenting the purpose and program for the workshop
- Each participant gives a short presentation of him/herself with focus on what he/she is currently working on and possible ideas for collaboration
- Ideas may include basic research issues/questions, proposals for projects: explore, SciTech and/or Bridge. The ideas do not have to be worked out in detail but can be on a quite early stage.
- A proposal may also be for a BOF session on Tuesday where there will have more time to discuss the idea.
- The chair shortly summarizes the workshop with the help of the secretary.

All PowerPoint slides will be uploaded and made available for all participants of the seminar using this link:
